Education

Technological University of the Philippines – Manila Campus

August 2025

Bachelor of Science in Information Technology

- Dean’s Lister for 2nd Semester of School Year 2021-2022
- Dean’s Lister for 1st Semester of School Year 2022-2023
- Dean’s Lister for 2nd Semester of School Year 2022-2023
- Dean’s Lister for 1st Semester of School Year 2023-2024
- Dean’s Lister for 2nd Semester of School Year 2024-2025

Activities / Seminar

Cloud Computing Seminar	2024
Artificial Intelligence Seminar	2024
Guardians of the Digital Realm: Navigating the Frontier of Cybersecurity and Information Security	2024

Experience

Capstone Project, Developer & Designer

September 2024 – 2025

Technological University of the Philippines - Manila

- Designed and developed an Ordering and Inventory System for a medical enterprise to streamline product tracking, order management, and stock monitoring.
- Took lead in full-stack development, handling both the front-end design and back-end functionality to ensure a responsive and efficient system.
- Followed the Agile development process, conducting iterative sprints, regular client feedback sessions, and continuous improvements throughout the project lifecycle.
- Created technical documentation including Entity-Relationship Diagrams (ERDs) and Data Flow Diagrams (DFDs) to visualize system structure and workflows.

Technical / Hardware Support, Intern

February 2025 – May 2025

Zenshin Systems Corporation – Quezon City

- Utilized Macrium Reflect to perform system imaging, disk cloning, and full OS recovery for backup and deployment purposes.
- Assisted in the setup and configuration of new computers, including OS installation, driver setup, and user account configuration.
- Troubleshoot and resolved system boot errors, hardware conflicts, and software compatibility issues across multiple devices.
- Assisted and mentored new employees, explaining the daily workflow, standard procedures, tools used, and best practices, including key dos and don’ts in system handling and support tasks.

Skills

Design/Frontend:

- Figma
- HTML/CSS
- Bootstrap
- React JS

Database:

- Firebase Database
- MySQL Workbench

Version Control:

- Git and GitHub

Programming Languages:

- Java, Java script

Technical / Hardware Support:

- System Imaging & Recovery
- Computer Troubleshooting
- System Setup & Configuration
